

POSTIODE DIP

DESCRIPTION

POSTIODE DIP is a care product in the form of a gel intended for the care of teats after milking. The preparation is ready to use. It has a high iodine content.

- Contains active iodine (5000ppm)
- Proven effectiveness according to PN-EN 1656 and PN-EN 1657 standards, which helps to prevent Mastitis
- Enriched with substances that make the epidermis more elastic, preventing irritation during milking
- The repellants contained in the composition act as a deterrent to insects
- Economical to use, does not drip from the teat
- Leaves a distinct brown film on the teat

Bactericidal action: for 5 minutes, temperature 30 ° C.

Fungicidal action: within 30 minutes, temperature 30 ° C.

Active substance: Iodine (including iodine polyvinylpyrrolidone) EC: 231-442-4, CAS: 7553-56-2, content: 0.5 g / 100g, glycolic acid EC: 201-180-5, CAS: 79-14 -1, content: 0.035 g / 100g

COMPOSITION

non-ionic surfactants

TECHNICAL REQUIREMENTS

AppearanceTransparent or iridescent liquid

pH.....4.5 ± 1.0

APPLICATION

Scope of application: Ready to use product, use undiluted. Using the dip cup, apply the preparation to the previously washed teat. Leave until the next milking.

WAY	DIPPING
CONCENTRATION [%]	100
TEMPERATURE	surroundings
Contact time	≥5 min

PRODUCT FOR PROFESSIONAL USE ONLY.

According to the instructions for use, the preparation is safe for all surfaces resistant to water and human and animal skin. In order to eliminate the adverse effect of the preparation on the surface with long-term contact, the test should be performed in a less visible place.

Recommendations:

Do not inhale the spray. Do not eat, drink or smoke while using the product.

COMPLETE INFORMATION ABOUT THE PRECAUTIONS REQUIRED WHEN WORKING WITH THE PREPARATION CAN BE FOUND IN THE DANGEROUS MATERIAL SAFETY DATA SHEET.
