

ROKO® AGRO POSTLAKTO MINT S

DESCRIPTION

POSTLAKTO MINT S is a care fluid for use in veterinary hygiene, intended for the care of teats after milking. The preparation is ready to use.

- Contains a mixture of lactic and salicylic acids as a non-oxidizing composition
- Effective against microorganisms, including typical bacteria responsible for Mastitis
- Enriched with substances that make the epidermis more elastic
- Thanks to the content of natural peppermint oil, it cools the teat after milking
- The repellants contained in the composition act as a deterrent to insects
- Economical to use, does not drip from the teat
- Leaves a distinct green film on the teat

Bactericidal action: for 5 minutes, temperature 30 ° C.

Fungicidal action: within 30 minutes, temperature 30 ° C.

Active substance: L - (+) - lactic acid EC 201-196-2, CAS 79-33-4, content 2.5 g / 100g, salicylic acid EC 200-712-3, CAS 69-72-7, content 0.15 g / 100g

COMPOSITION

anionic surfactants

TECHNICAL REQUIREMENTS

Appearance whitened liquid

pH 4.5 ± 0.5

Density at 20 ° C, g / cm³ 1.035 ± 0.030

APPLICATION

Scope of application:

Ready to use product, use undiluted. Using the dip cup, apply the preparation to the previously washed teat. Leave on the teat until the next milking.

PRODUCT FOR PROFESSIONAL USE ONLY.

According to the instructions for use, the preparation is safe for all water-resistant surfaces, as well as human and animal skin. In order to eliminate the negative influence of the preparation on the surface with prolonged contact time, the test should be performed in a hardly visible place.

Recommendations:

Do not inhale the spray. Do not eat, drink or smoke while using the product.

COMPLETE INFORMATION ABOUT THE PRECAUTIONS REQUIRED WHEN WORKING WITH THE PREPARATION CAN BE FOUND IN THE DANGEROUS MATERIAL SAFETY DATA SHEET.
