

## ROKO® PROFESSIONAL KAMIEŃ I RDZA

### DESCRIPTION

STONE AND RUST is an acidic agent intended for thorough washing and cleaning of sanitary equipment and surfaces, tiles, fittings and equipment, including in swimming pools, washrooms, baths, showers and for cleaning acid-resistant surfaces. Automatically removes persistent dirt and limescale deposits, urine and other traces of organic origin. Use for cleaning: ceramics, porcelain, plastics, caoutchouc, rubber and glass

### COMPOSITION

non-ionic surfactants, anionic surfactants, perfume

### TECHNICAL REQUIREMENTS

Look.....transparent or opalescent liquid

pH.....max. 3,0

Density at 20°C, g/cm<sup>3</sup>.....1.040 ± 0.020

### APPLICATION

How to use: Spread the preparation evenly with a sponge, cloth or directly on the cleaned surface. For best results, leave it on for about 10 minutes, then rinse with water. In case of heavy soiling, repeat the operation. Do not use on acid-sensitive surfaces, e.g. marble, email, sandstone, chrome, acid-resistant fittings.

**For professional use only!**
