

ROKO® PROFESSIONAL WC GEL

DESCRIPTION

WC GEL is a preparation in the form of a gel intended for cleaning toilet bowls, urinals and other sanitary devices made of ceramics. Thanks to the consistency of the gel, it stays on the cleaned surfaces for a long time. It prevents the build-up of scale and rust, urine and other organic residues. Leaves a long-lasting scent on the cleaned surfaces.

COMPOSITION

non-ionic surfactants, anionic surfactants, perfume

TECHNICAL REQUIREMENTS

Appearance.....transparent or opalescent liquid

pH.....max.4.0

Density at 20°C, g/cm³.....1.025 ± 0.020

APPLICATION

How to use: Spread the gel evenly under the rim and on the walls of the shell. Do not dilute. For better results, leave it on for about 10 minutes, then rinse with water. In case of stubborn dirt, repeat the operation and use a toilet brush to clean.

Recommendations: Do not mix with other cleaning agents, especially those based on chlorine

For professional use only!
