

ROKO[®] PROFESSIONAL EKO STANDARD

DESCRIPTION

Liquid soap with glycerin and lanolin is intended for washing and skin care. Perfectly protects the skin against drying and irritation. By penetrating the epidermis, glycerin retains water in its deeper parts and smoothes the skin. Lanolin, on the other hand, perfectly conditions and nourishes the skin, and additionally has skin softening properties. It has a natural pH for the skin.

COMPOSITION

Aqua , Sodium Laureth Sulfate , Cocamide DEA, Sodium Chloride , Cocamidopropyl Betaine , Glycol Distearate , Cocamide MEA, Glycerin , PEG-75
Lanolin, Methylchloroisothiazolinone , Methylisothiazolinon , Parfum , Hexyl Cinnamal , Citronellol

TECHNICAL REQUIREMENTS

Look.....whitened liquid
pH 6,5 ± 1,5
Density at 20°C, g/cm³.....1.020 ± 0.020

APPLICATION

Liquid soap for washing hands and body with a delicate aroma of lily of the valley. Gentle on the skin. The high content of surfactants, average chloride concentration and the use of moisturizing ingredients make it an economical solution for relatively demanding users.

How to use: Apply a small amount of soap on a damp hand or sponge and spread over the surface of the moistened body. Rinse with water after washing.
