

## ROKO® PROFESSIONAL SOLVAREN CIP-D

### DESCRIPTION

ROKO PROFESSIONAL SOLVAREN CIP-D liquid for cleaning and disinfecting devices in contact with food and animal nutrition, for use in CIP circulation systems in the food industry and on farms for cleaning milking equipment (by immersion method). It has a bactericidal and fungicidal effect.

Active substance: active chlorine released by sodium hypochlorite EC 231-668-3, CAS 7681-52-9, content 4.5 - 6.0 g / 100 g.

### COMPOSITION

chlorine-based bleaching compounds, phosphonates

### TECHNICAL REQUIREMENTS

Appearance ..... Transparent or opalescent liquid

pH .....min. 11.0

Density at 20°C, g / cm<sup>3</sup> .....1.250 ± 0.050

### APPLICATION

Directions for use: Introduce the prepared working solution into the dosing device in the CIP system. After using the product for the required disinfection time, the surfaces should be thoroughly rinsed with drinking water. The product has a bactericidal effect at a concentration of 1% (1 g / 100 g) for 5 minutes at 20 ° C, 1.5% fungicidal activity (1.5 g / 100 g) - for 15 minutes at a temperature of 20 ° C. The product is intended for use in a diluted form.

Recommendations: In the event of any liquid spillage onto the surface, rinse immediately with water. Wash hands after use. Use in well-ventilated rooms. The ventilation time after using the preparation is 10-15 minutes. Prevent the undiluted product from entering drains, surface waters and groundwater. Protect against contamination of the drinking water intake. Do not inhale vapors of the product. Do not eat, drink or smoke while using the product.

Please read the product safety data sheet before using the product.

**For professional use only!**
